

BOCCE BALL TOURNAMENT

The tournament will consist of three (3) games of 8 ends equaling 4 frames.

Court size is 12 feet wide by 60 feet long.

The goal of the game is to throw your balls closer to the target ball than your opponent.

A coin toss will determine which team will play first. The team to play first will throw out a target ball. The target ball must pass the centre line. Player will be allowed two attempts to place the target ball; if not successful, the target ball goes to the opposing team.

The first team throws out one ball then steps aside and allows the other team to play. The second team attempts to throw their first ball closer to the target ball.

Whenever one team gets a ball closer to the target ball than the opponent's closest ball, they step aside and allow the opponent to play.

Each team will alternate players after each throw.

This continues until each team has thrown all balls.

If the ball is touching the line when it stops, it will be considered **in play**. If the ball crosses the line, it will be considered **out of play**. If the target ball is hit out of bounds, place the target ball 1 foot inside the court at the place of exit.

One point is awarded for every ball that is closer than the opponent's closest ball to the Target ball. If both team's closest ball are equidistant from the Target ball, then no points are awarded.

The team that scored last will throw the target ball to start the next frame.

REFEREES ONLY WILL BE ALLOWED ON THE COURT!!
